SPECIAL VOLUME

THE BALTIC SHIELD

IGCP - 275
DEEP GEOLOGY OF THE BALTIC/FENNOSCANDIAN SHIELD

Edited by

ROLAND GORBATSCHEV

University of Lund, Institute of Geology, Department of Mineralogy and Petrology, Sölvegatan 13, S-2234 62 Lund, Sweden

CONTENTS

Preface 1

Frontiers in the Baltic Shield
R. Gorbatschev and S Bogdanova 3
The Moho depth distribution in Fennoscandia and the regional tectonic evolution from Archean to Permian times
J.J. Kinck, E.S. Husebye and F.R. Larsson 23
Heat flow in the Baltic Shield—results of the lithospheric geothermal modelling
V. Čermák, N. Balling, I. Kukkonen and V.I. Zui 53
Delineation and character of the Archaean–Proterozoic boundary in northern Sweden
B. Öhlander, T. Skiöld, S.-Å. Elming, B.W. Group, S. Claesson and D.H. Nisca 67
Electrical conductivity distribution of the lithosphere in the central Fennoscandian Shield
T. Korja 85
Svecofennian detrital zircon ages—implications for the Precambrian evolution of the Baltic Shield
S. Claesson, H. Huhma, P.D. Kinny and
I.S. Williams 109
The "Saamian" of the Belomorian Mobile Belt: new geochronological constraints
S.V. Bogdanova and E.V. Bibikova 131
The POLAR Profile revisited: combined P- and S-wave interpretation
C. Walther and E.R. Flüh 153
Seismic properties of rocks exposed in the POLAR profile region—constraints on the interpretation of the refraction data
H. Kern, Ch. Walther, E.R. Flüh and M. Marker 169
Late Archaean Sm–Nd model ages from the Voche-Lambina area: implications for the age distribution of Archaean crust in the Kola Peninsula, Russia
J. Stephen Daly, F.P. Mitrofanov and L.N. Morozova 189
Isotope data on the age and genesis of layered basic–ultrabasic intrusions in the Kola Peninsula and northern Karelia, northeastern Baltic Shield
Y.A. Balashov, T.B. Bayanova and F.P. Mitrofanov 197
Major Palaeoproterozoic shear zones of the central Fennoscandian Shield
A. Kärki, K. Laajoki and J. Luukas 207
Chronology of Proterozoic orogenic processes at the Archaean continental margin in northern Sweden
T. Skiöld, B. Öhlander, H. Markkula, L. Widenfalk and L.-Å. Claesson 225
Petrochemical and petrological characteristics of 1.9 Ga old volcanics in northern Sweden
J.-A. Perdahl and R. Frietsch 239
Palaeoproterozoic glaciomarine sedimentation in an extensional tectonic setting: the Honkala Formation, Finland
K.O. Strand and K. Laajoki 253
Geophysical interpretation of the crustal and upper mantle structure in the Wiborg rapakivi granite area, southeastern Finland
S. Elo and A. Korja 273
Palaeoproterozoic age of the East Baltic granulitic crust
V. Puura and H. Huhma 289

The late Svecofennian granite–migmatite zone of southern Finland—a belt of transpressive deformation and granite emplacement
C. Ehlers, A. Lindroos and O. Selonen 295
Crustal variations in the Baltic Sea; a geologic evaluation of satellite altimetry data
K.O. Wannäs and K.L. Hayling 311
Age and geochemistry of granites associated with Mo-mineralizations in western Bergslagen, Sweden
K. Sundblad, M. Ahl and H. Schöberg 319
Denudation surfaces and tectonics in the southernmost part of the Baltic Shield
K. Lidmar-Bergström 337
Late Sveconorwegian metamorphism and deformation in southwestern Sweden
L. Johansson and L. Kullerud 347
The early evolution of the Southwest Swedish Gneiss Province: geochronological and isotopic evidence from southernmost Sweden
Å. Johansson, M. Meier, F. Oberli and H. Wikman 361
Sm–Nd geochronology of Sveconorwegian granulite facies mineral assemblages in the Bamble Shear Belt, South Norway
L. Kullerud and S.H. Dahlgren 389
Isotopic constraints on the timing of crustal accretion of the Bamble Sector, Norway, as evidenced by coronitic gabbros
G.-J.L.M. De Haas, R.H. Verschure and C. Maijer 403
The southern border of Baltica—a review of the present state of knowledge
D. Franke 419
